These collected chapters and interviews explore the current issues and debates about how copyright will or should adapt to meet the practices of 21st-century creators and internet users. The book begins with an overview of copyright law basics. It is organized by parts that correspond to creative genres: Literary Works, Visual Arts, Fine Art, Music, Video Games and Virtual Worlds, Fashion, and Technology. The chapters and interviews address issues such as copyright ownership in work created by Artificial Intelligence (AI), the musical remix market, whether appropriation is ever a fair use of a copyrighted work or if it is always theft, and whether internet-based platforms should do more to deter piracy of creators' works. Each part ends with an essay explaining the significance of one or two landmark or trendsetting cases to help the reader understand the practical implications of the law.

Written to be accessible to both lay and legal audiences, this unique collection addresses contemporary legal issues that all creators need to understand and will be essential reading for artists, designers, and musicians as well as the lawyers who represent them.

Aligned with the CCSS and the TEKS College and Career Readiness Standards, IIM: Teaching Research Skills in Grades K-12 offers a comprehensive plan for integrating a schoolwide research program into existing curriculum. The seven-step Independent Investigation Method (IIM) guides students through group and independent research projects, empowering them with the skills to conduct research in any discipline and to pursue projects in subjects of most interest to them. This teacher's manual provides the tools to implement the IIM program with students at all grade levels, acting as a template on which to build curriculum that both fulfills local and state requirements and is appropriate for all students' skill levels and needs. This manual includes: steps for the whole-class process, in which students learn basic research skills; steps for the independent process, in which students apply

skills in individual and small-group studies; reproducible pages for designing and implementing units; sample research studies using the independent process; reproducible assessment forms and student handouts; teacher resource pages; and online access to editable teacher, student, and assessment forms.
