

A Tune A Day Violin Instruction Book 3

These easy-to-read, progressive exercises by Joanne Martin develop a student's reading skills one stage at a time, with many repetitions at each stage. I Can Read Music is designed as a first note-reading book for students of string instruments who have learned to play using an aural approach such as the Suzuki Method®, or for traditionally taught students who need extra note reading practice. Its presentation of new ideas is clear enough that it can be used daily at home by quite young children and their parents, with the teacher checking progress every week or two.

Now, for the first time, C. Paul Herfurth's original books have been completely rewritten with new music and the latest in instrument technique for a new generation of musicians. A New Tune A Day books have the same logical, gentle pace, and keen attention to detail, but with a host of innovations.

Piano accompaniments for the popular Suzuki Violin School, Volume 2. Titles: * Chorus from Judas Maccabaeus (G. F. Handel), Musette (J. S. Bach) * Hunters' Chorus (C. M. v. Weber) * Long, Long Ago (T. H. Bayly) * Waltz (J. Brahms) * Bourrée (G. F. Handel) * The Two Grenadiers (R. Schumann) * Theme from Witches' Dance (N. Paganini) * Gavotte from Mignon (A. Thomas) * Gavotte (J. B. Lully) * Minuet in G (L. van Beethoven) * Minuet (L. Boccherini)

These are the original editions of the ever-popular instruction books for various instruments by C. Paul Herfurth. The books are packed full of lessons, illustrations, fingering charts, daily practice records, test questions, and manuscript paper for homework. Perfect for use in group lessons, school classes, or for individual lessons.

The Doflein Method. The Violinist's Progress. Volume I: The higher positions (4th to 10th positions) A course of violin instruction combined with musical theory and practice in duet-playing.

The pieces in this book have been selected for their musical and technical value. They have been carefully transcribed and edited to create interest in technical development and in general musicianship.

They provide supplementary materials which can be used with any standard string method. By studying the text carefully, and with the teacher's help, the young student will develop a foundation for a fine left-hand technic and bow arm. This volume includes the basic solid bowings and the slow spiccato stroke in the fundamental rhythms.

The complete instruction tutor for the flute. Takes you through the basic techniques and allows you to progress to an advanced stage of playing.

Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Includes an audio CD - with actual performances and backing tracks, explanatory diagrams and photographs. Each book contains: advice on the equipment you need; instructions for an effective technique and a comfortable posture; explanatory section on reading music; and more.

(Willis). The Dozen a Day books are universally recognized as one of the most remarkable technique series on the market for all ages! Each book in this series contains short warm-up exercises to be played at the beginning of each practice session, providing excellent day-to-day training for the student.

Dr. Suzuki questioned why all vocalists vocalize every day to improve their voices, but instrumentalists do not do so every day with their instruments. He believes that on any instrument, one needs to practice to make a more beautiful tone. First he talks about playing a beautiful resonant tone with the bow while plucking the string with a finger. When a pizzicato is played, the resonance goes on for a long time. Students should listen to that resonance and play the same kind of clear beautiful sound. He talks about how to make a difference in the tone by using a different bow speed, how to practice to find the resonance point, how to change the weight of the arm on the bow to produce a different kind of tone, and how to change tone color. This book includes all of Dr. Suzuki's basic ideas about tone.
