Are you looking for a genuine introduction to the linguistics of English that provides a broad overview of the subject that sustains students' interest and avoids excessive detail? Introducing English Linguistics accomplishes this goal in two ways. First, it takes a top-down approach to language, beginning with the largest unit of linguistic structure, the text, and working its way down through successively smaller structures (sentences, words, and finally speech sounds). The advantage of presenting language this way is that students are first given the larger picture - they study language in context - and then see how the smaller pieces of language are a consequence of the larger goals of linguistic communication. Second, the book does not contain invented examples, as is the case with most comparable texts, but instead takes its sample materials from the major computerised databases of spoken and written English, giving students a more realistic view of language.

This book concerns particles that are used as responses in conversations. It provides much needed methodological tools for analyzing the use of response particles in languages, while its particular focus is Finnish. The book focuses on two Finnish particles, *nii(n)* and *joo*, which in some of their central usages have "yeah" and "yes" as their closest English counterparts. The two particles are discussed in a number of sequential and activity contexts, including their use as answers to yes-no questions and directives, as responses to a stance-taking by the prior speaker, and in the midst of an extended telling by the co-participant. It will be shown how there is a fine-grained division of labor between the particles, having to do with the epistemic and affective character of the talk and the continuation vs. closure-relevance of the activity. The book connects the interactional usages of the particles with what is known about their historical origins, and in this fashion it is also of interest to linguists doing research on processes of grammaticalization and lexicalization.
