

Basic Finance Formula Sheet

This text presents basic concepts of economics and tools for financial management in the health care arena, including budgeting, breakeven analysis, financial reporting, business plan preparation, and grant writing. The text includes practical case examples drawn from actual health care settings to relate theory to real-world practice. A sample grant proposal and unique grant writing chapter will prepare students for this critical aspect of management. A free, back-of-book CD-ROM provides sample worksheets for analyzing budgets and determining breakeven points, cost-benefit, and cost-effectiveness, as well as sample budgets. Students can use the worksheets to apply their own data and complete their own analyses.

This text in a hundred pages explains how to make a bookkeeping and financial reporting system in Google Sheets or Microsoft Excel. It is the simpler, faster, and better 2nd edition of a tried-and-tested double-entry system, whose 1st edition was already smart, dependable, and easy to use. The text pragmatically and directly links accounting, ICT, and business management. It covers profit & loss, balance sheet, cash flow, explanatory notes & specifications, journal & ledger, rolling & fixed budget, group consolidation and KPI monitoring, system audit, error checking, data validation, and troubleshooting. The system features automated sales tax/VAT with multiple rates and withheld tax, IFRS/GAAP compliant currency accounting with daily spot rate lookup, multiple reporting entities with multiple banks and types of bills, and unique hard-to-get facilities like dynamic single-entry sub-accounting, spreadsheet formula integration, and reporting in other languages. The author is a senior businessperson with an MBA degree from Henley Business School, who owns and manages a portfolio of firms. The design is free from programming (VBA, scripts, macros...) and hard limit usage tiers (number of businesses, reports, accounts, records, currencies...).

Master corporate valuation: the financial art and science of accurately valuing any business. George Chacko's Applied Corporate Finance: Valuation is the first valuation book to combine true academic rigor with the practical skills you need to successfully value companies in the real world. Renowned financial instructor and investment manager George Chacko focuses on concepts, techniques, tools, and methodologies that lead directly to accurate valuations, and explains each key concept with up-to-date examples. One step at a time, Chacko develops a practical, rigorous approach to conducting valuation, addressing the projection of financial statements, calculation of free cash flows, risk-adjusted cost of capital, and leading methodologies including WACC, flow-to-equity, and Adjusted Present Value (APV). By avoiding elementary content that financial managers, analysts, and MBA-level finance students already know, this book can focus more tightly on the realistic techniques and advanced issues practitioners are actually concerned with. Coverage includes: market value and accounting balance sheets, cash cycles, the DuPont formula, financial distress, and capital as a risk buffer; constructing pro-formas, projecting and bridging financing shortfalls, and planning sustainable growth; sources/uses of cash, cash income statements, pro-forma balance sheet changes, working capital, depreciation, and capital expenditures; risk-free cost, investment risks, and diversifiable vs. idiosyncratic risks; NPV, APV, Optimal Debt Ratios, Capital Structure Dynamics, Terminal Value Calculations, and more. For all finance professionals, analysts, and MBA students who need to sharpen their skills in valuation and related areas of corporate finance, accounting, or strategic planning.
