Speaking to the teachers at the first Waldorf school in Stuttgart, Steiner asserts that the unfortunate presence of dishonesty and alienation in society today cannot be addressed without a completely renewed and holistic education. He states fact that successful teaching requires a living synthesis of the "spiritual gymnast," the "ensouled rhetorician," and the "intellectual professor." Of these, the formative effect of the rhetorician's cultivation of artistic speech is the most important. "It's impossible for true teaching to be boring," declares Steiner, and he offers several examples of how teachers can observe a natural phenomenon so intimately that its creative life can flow into the children through a teacher's own words in the classroom. He also describes, in spiritual scientific depth, how the actions of teachers directly affect the physiological chemistry of their students. From this perspective, education is really therapy, transformed to a higher level, and should be seen as closely related to the healing arts. Steiner also shows how the perception of hidden relationships between education and the processes of human development can kindle a heartfelt enthusiasm and a sense of responsibility in teachers for the far-reaching health effects that educational activities can produce.

Essays on international relations by Indian and Western scholars are organized around four themes central to the study of world politics: international relations theory; international society; regional politics; and foreign policy. An introduction offers a critical review of international relations theory, demonstrating that its dominance by post-1945 Anglo-American studies causes it to be parochial in nature, and suggesting a basis for theoretical synthesis. The weary student handbook genre is in need of a belligerent mauling. This is our crack at the job. We don't want to talk down to anyone, but neither do we want to chat them up, so this is an attempt at thinking out the university from our own perspective, that of students. Here we air our dirty snapshot of the academy, at least semi-naked, just as we come across it. This potted guide is our pot shot at undressing and dressing down this place, the university, and understanding our place within it: its problems and potential, its power-relations and its possibilities for politicisation. It is not an outpouring of theories, more stories - a collection of experiences and practical tips, observations, suggestions and clues - a thinking (and occasional fantasizing) out loud. This is our attempt to share some of the knowledge to be gleaned in the university, but a knowledge that is rarely measured on any certificate come graduation day. Written collectively by the University for Strategic Optimism, in the queasy come-down afterglow of the recent wave of student activism in the UK (but looking forward to cracking-off another round), this guide attempts to contextualise our struggle and to bring it closer to home. Just what is the university that we are fighting for anyway? And what perhaps could it be?

In this pathbreaking book, Richard D'Aveni shows how competitive moves and countermoves escalate with such ferocity today that the traditional sources of competitive advantage can no longer be sustained. D'Aveni argues that a company must fundamentally shift its strategic focus. He constructs a comprehensive model that shows how firms move up "escalation ladders" as advantage is continually created, eroded, destroyed, and recreated through strategic maneuvering in "four arenas" of competition. Using detailed examples from hypercompetitive industries such as computers, automobiles, and pharmaceuticals, D'Aveni demonstrates how hypercompetitive firms succeed by disrupting the status quo and creating a continuous series of temporary advantages. With its emphasis on real-world experiences of corporate warfare, this abridged paperback edition of D'Aveni's masterwork will be essential reading for scholars and managers alike - a perfect introduction to the battlefield of hypercompetitive rivalries.
