The world's leading scientific thinkers explore bold, remarkable, perilous ideas that could change our lives—for better . . . or for worse . . . From Copernicus to Darwin, to current-day thinkers, scientists have always promoted theories and unveiled discoveries that challenge everything society holds dear; ideas with both positive and dire consequences. Many thoughts that resonate today are dangerous not because they are assumed to be false, but because they might turn out to be true. What do the world's leading scientists and thinkers consider to be their most dangerous idea? Through the leading online forum Edge (www.edge.org), the call went out, and this compelling and easily digestible volume collects the answers. From using medication to permanently alter our personalities to contemplating a universe in which we are utterly alone, to the idea that the universe might be fundamentally inexplicable, What Is Your Dangerous Idea? takes an unflinching look at the daring, breathtaking, sometimes terrifying thoughts that could forever alter our world and the way we live in it. Contributors include Daniel C. Dennett • Jared Diamond • Brian Greene • Matt Ridley • Howard Gardner and Freeman Dyson, among others

Want to learn how to create great user experiences on today's Web? In this book, UI experts Bill Scott and Theresa Neil present more than 75 design patterns for building web interfaces that provide rich interaction. Ansel Adams (1902-1984) produced some of the 20th century's most iconic photographic images and helped nurture the art of photography through his creative innovations and peerless technical mastery. The Print--the third volume in Adams' celebrated series of books on photographic techniques--has taught generations of photographers how to explore the artistic possibilities of printmaking. Examples of Adams' own work clarify the principles discussed. This classic handbook distills the knowledge gained through a lifetime in photography and remains as vital today as when it was first published. The Print takes you step-by-step--from designing and furnishing a darkroom to mounting and displaying your photographs, from making your first print to mastering advanced techniques, such as developer modifications, toning and bleaching, and burning and dodging. Filled with indispensable darkroom techniques and tips, this amply illustrated guide shows how printmaking--the culmination of photography's creative process--can be used expressively to enhance an image. A beautiful new edition of "the greatest dessert book in the history of the world" (Bon Appétit), featuring 175 timeless recipes from Gramercy Tavern's James Beard Award–winning pastry chef. Claudia Fleming is a renowned name in the pastry world, acclaimed for having set an industrywide standard at New York City's Gramercy Tavern with her James Beard Award–winning desserts. With The Last Course, dessert lovers everywhere will be able to re-create and savor her impressive repertoire at home. Fleming's desserts have won a range of awards because they embody her philosophy of highly satisfying food without pretension, a perfect balance for home cooks. Using fresh, seasonal ingredients at the peak of their flavor, Fleming creates straightforward yet enchanting desserts that are somehow equal to much more than the sum of their parts. She has an uncanny ability to match contrasting textures,

flavors, and temperatures to achieve a perfect result—placing something brittle and crunchy next to something satiny and smooth, and stretching the definition of sweet and savory while retaining an elemental simplicity. The Last Course contains 175 mouthwatering recipes that are organized seasonally by fruits, vegetables, nuts, herbs and flowers, spices, sweet essences, dairy, and chocolate. In the final chapter, Fleming suggests how to combine and assemble desserts from the previous chapters to create the ultimate composed desserts. And each chapter and each composed dessert is paired with a selection of wines. Recipes include Raspberry–Lemon Verbena Meringue Cake, Blueberry–Cream Cheese Tarts with Graham Cracker Crust, Cherry Cheesecake Tart with a Red Wine Glaze, Concord Grape Sorbet, Apple Tarte Tatin, Chestnut Soufflés with Armagnac-Nutmeg Custard Sauce, Buttermilk Panna Cotta with Sauternes Gelée, Warm Chocolate Ganache Cakes, and more. Beautifully illustrated with more than eighty photographs throughout, The Last Course is a timeless, one-of-a-kind collection filled with original recipes that will inspire dessert enthusiasts for years to come. Praise for The Last Course "While I must admit to being particularly partial to Claudia's Buttermilk Panna Cotta, every dessert in The Last Course made me salivate. Claudia's inspired recipes are so beautifully transcribed that even the most nervous of home cooks will feel comfortable trying them and will be a four-star chef for the day."—Daniel Boulud "The Goddess of New American Pastry."—Elle

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration?s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Bon vivant, railroad historian, photographer, pioneering food critic, chronicler of New York's café society, and noted newspaperman, Lucius Beebe (1902–1966) was an American original. In 1938, with the publication of High Iron: A Book of Trains, he transformed the world of railroad-subject photography forever by inventing the railroad picture book genre. In 1940, he met creative and life partner Charles Clegg (1916–1979), also a talented photographer. Beebe and Clegg produced an outstanding and diverse portfolio of mid-twentieth century railroad-subject photographs. Beebe, sometimes with Clegg, also authored about forty books, including many focused on railroads and railroading. The Railroad Photography of Lucius Beebe and Charles Clegg brings their incredible story and best photographic work together. Providing an

extensive biographic introduction to Beebe and Clegg, author Tony Reevy presents a multi-faceted view of the railroad industry that will appeal to rail enthusiasts as well as those interested in American food culture, the history of New York City, and LGBT studies. The Railroad Photography of Lucius Beebe and Charles Clegg is an indispensable history to the work of two men who forever changed the way we see and experience American railroads. In this darkly satirical send-up of academia and the Midwest, we are introduced to Moo University, a distinguished institution devoted to the study of agriculture. Amid cow pastures and waving fields of grain, Moo's campus churns with devious plots, mischievous intrigue, lusty liaisons, and academic one-upmanship, Chairman X of the Horticulture Department harbors a secret fantasy to kill the dean; Mrs. Walker, the provost's right hand and campus information queen, knows where all the bodies are buried; Timothy Monahan, associate professor of English, advocates eavesdropping for his creative writing assignments; and Bob Carlson, a sophomore, feeds and maintains his only friend: a hog named Earl Butz. Wonderfully written and masterfully plotted, Moo gives us a wickedly funny slice of life.

Finally, a Photoshop book that is written expressly for professional photographers and hi-end serious amateurs that doesn't talk about F-stops, exposures, and how to frame a shot (you know all that stuff already--if you don't¿I hate to say it, but this isn't for you). This new book, from Photoshop User magazine editor and bestselling author Scott Kelby, starts at the moment your digital camera photos come into Photoshop, and he shows you the Photoshop pros techniques for managing, correcting, retouching and outputting your photos to knock your client's socks off, and turn you into a Photoshop production wizard. This book is

absolutely ideal for traditional photographers who are making the jump to digital photography, and Scott's casual, step-by-step, plain-English style makes even the most complex Photoshop techniques seem so easy and accessible. It's the type of book that makes you smile and think "Ahhhh, so that's how they do it" and then immediately you realize "Hey, I can do this!" The entire book is graphically rich, in full color cover-to-cover, and best of all it's packed with real-world project-based tutorials that will take you through the process of sizing your images with the proper resolution (and the secret to doing so without losing image quality), how to deal with High ISO noise, blue channel noise, and other common plagues introduced by digital cameras; you'll learn how the pros color correct their photos for output on everything from inkjet printers to printing presses, and the secrets to getting perfect fleshtones no matter where it¿s output. You'll learn the sharpening techniques today's top digital photographers use, and how the leading retoucher's perform "digital plastic surgery" in Photoshop, plus professional facial retouching techniques using Photoshop 7.0's amazing new tools. Plus, you'll also learn how to manage your photos, "digital dodging and burning" tricks, dealing with common problems, making client presentations within Photoshop and on the Web, and the inside tips on how to work faster and more efficiently than you ever thought possible. If you're serious about digital photography and Photoshop, this is book you've been waiting for.

In this international collection of papers there is a wealth of knowledge on artificial intelligence (AI) and cognitive science (CS) techniques applied to the problem of providing help systems mainly for the UNIX operating system. The research described here involves the representation of technical computer concepts, but also the representation of how users conceptualise such concepts. The collection looks at computational models and systems such as UC, Yucca, and OSCON programmed in languages such as Lisp, Prolog, OPS-5, and C which have been developed to provide UNIX help. These systems range from being menu-based to ones with natural language interfaces, some providing active help, intervening when they believe the user to have misconceptions, and some based on empirical studies of what users actually do while using UNIX. Further papers investigate planning and knowledge representation where the focus is on discovering what the user wants to do, and figuring out a way to do it, as well as representing the knowledge needed to do so. There is a significant focus on natural language dialogue where consultation systems can become active, incorporating user modfelling, natural language generation and plan recognition, modelling metaphors, and users' mistaken beliefs. Much can be learned from seeing how AI and CS techniques can be investigated in depth while being applied to a real test-bed domain such as help on UNIX.

Over 2,000 manuscripts accessioned between 1991 and 1995 are described and indexed in this latest volume of the Catalogue of Additions. They range from a 9th-century fragment of St Aldhelm's work to papers of the contemporary author Edward Upward and the economist Sir Roy Harrod. The Trumbull family papers in 380 volumes are the largest of the historical collections catalogued here, whilst modern composers are especially well represented by the comprehensive archives of Cornelius Cardew, Humphrey Searle, Andrzei Panufnik and Sir Peter Maxwell Davies. Notable single volumes include two Books of Hours of the 14th and 15th centuries and Sir William

Dugdale's "Book of Monuments" (1640-1641).
