The New Black is Darian Leader's compassionate and illuminating exploration of melancholy. What happens when we lose someone we love? A death, a separation or the break-up of a relationship are some of the hardest times we have to live through. We may fall into a nightmare of depression, lose the will to live and see no hope for the future. What matters at this crucial point is whether or not we are able to mourn. In this important and groundbreaking book, acclaimed psychoanalyst and writer Darian Leader urges us to look beyond the catch-all concept of depression to explore the deeper, unconscious ways in which we respond to the experience of loss. In so doing, we can loosen the grip it may have upon our lives. 'His orthodox, psychoanalytical approach, produces an unpredictable, occasionally brilliant book. The New Black is a mixture of Freudian text, clinical assessments and Leader's own brand of

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof

well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

An exclusive look at one of the world's most successful and controversial companies, and the mysterious family behind it. BMW is arguably the most admired carmaker in the world. It's financial performance is the envy of its competitors, and BMW products inspire near-fanatical loyalty. While many carmakers struggle with falling sales, profits and market share, demand for BMWs continues to grow, frequently outpacing production. Now, David Kiley-Detroit Bureau Chief at USA Today and author of *Getting the Bugs Out*, which covered Volkswagen's demise and rebirth, goes inside the fabled German automaker to see how it does what it does so well. With unprecedented access to BMW executives, Kiley goes behind the walls of BMW's famed "Four Cylinders" headquarters in Munich at a time when the company is in its most aggressive,

and some say riskiest, expansion in its history and when some of the company's new products, like the 7 Series sedan and Z4 roadster, are for the first time drawing as many barbs from critics as bouquets. Kiley covers intimate details of the boardroom drama surrounding the company's nearly disastrous acquisition and subsequent sale of the British Rover Group and its expansion into selling MINI and Rolls Royce cars. Besides being a world-class carmaker, BMW is also considered one of the smartest consumer marketing companies and Kiley explores the extraordinary value and management of the BMW brand mystique. He also takes a revealing look at the mysterious and ultra-private Quandt family of Bad Homburg Germany, which owns a controlling stake in BMW: Johanna and Susanne Quandt, two of the wealthiest women in Europe and Stefan Quandt, one of the wealthiest bachelors on the continent. David Kiley (Ann Arbor, MI) is the Detroit Bureau Chief at USA Today who has covered the auto industry for 17 years. He has been featured on Nightline, CNBC, CNN, MSNBC, NPR and the Today show. He is also the author of *Getting the Bugs Out: The Rise, Fall, and Comeback of Volkswagen in America* (0-471-26304-4), also available from Wiley. Caravan & Motorhome Electrics is the totally rewritten successor of the original globally selling Motorhome Electrics. The book's content now also covers every aspect of designing, installing and fault finding of the electrics in fifth wheel and conventional caravans and camper trailers. The book explains how things work, and what they do (not what vendors claim they do). It shows how to dramatically improve charging performance, successfully install solar, and reduce energy draw of electric (especially) three-way fridges. Essentially it provides solutions proven to work, not suggestions that may work. The author shows how the ongoing move fully voltage controlled alternators necessitates dc-dc alternator charging. And that, post 2016, regulations are likely to limit or even preclude alternator charging with new vehicles. It covers the solutions in depth: i.e. solar, plus fuel cell's 24/7 power generation (light and compact yet silent and non-polluting (and now existing in LPG form), needing only a small battery for peak loads. As with all Collyn's books, the content is thoroughly researched, technically accurate, yet in plain English, plus explanatory illustrations, many of the author's own vehicles. The author's background includes automobile research, electronics and large scale magazine
