From the inside out, this study of a democratic philanthropy probes the world of social movement funding.

La Guida Pratica 2015 dedicata all'imposizione diretta è aggiornata con tutte le novità delle manovre estive 2015 e di prassi relative alle imposte dirette, all'accertamento, alla riscossione e alle agevolazioni. In modo operativo, con un linguaggio chiaro e l'impostazione propria del "Sistema Frizzera24" è commentata la normativa con i correlati chiarimenti ministeriali. Completano ed arricchiscono il volume le schede di approfondimento GPF + ad aggiornamento continuo on line ([www.gpfpiu.ilsole24ore.com](http://www.gpfpiu.ilsole24ore.com)). Ha collaborato all'aggiornamento della Guida Luca Bilancini.

This volume brings together an exciting range of new studies of top incomes in a wide range of countries from around the world. The studies use data from income tax records to cast light on the dramatic changes that have taken place at the top of the income distribution. The results cover 22 countries and have a long time span, going back to 1875.

Van Gennep was the first observer of human behaviour to note that the ritual ceremonies that accompany the landmarks of human life differ only in detail from one culture to another, and that they are in essence universal. Originally published in English in 1960.

This edition reprints the paperback edition of 1977.

Research in Labor Economics volume 43 contains new and innovative research on the causes and consequences of inequality. This report examines recent developments in gender equality in education, employment, entrepreneurship and public life. It contains one overview chapter and 24 short chapters, each with key findings and policy recommendations.

La Guida Pratica Imposte Dirette 2/2021 illustra, con una trattazione completa e operativa, la normativa e la prassi in tema di imposte sul reddito delle persone fisiche e delle società, Irap, accertamento, agevolazioni tributarie, riscossione, reati tributari e sanzioni amministrative e ravvedimento operoso. Questa edizione è aggiornata, da ultimo, con le novità della Legge di Bilancio 2021 (L. 178/2020) e del D.L. Milleproroghe (D.L. 183/2020).

This book approaches the tourism and hospitality industry from a regional science perspective. By analyzing the spatial context of tourist travels, the hospitality sector, and the regional impacts of tourist activities, it demonstrates the value of the regional science paradigm for understanding the dynamics and effects of tourism and hospitality-related phenomena. Written by leading regional science scholars from various countries as well as professionals from organizations such as OECD and AirBnB, the contributions address topics such as migration, new types of accommodation, segmentation of tourism demand, and the potential use of tracking technologies in tourism research. The content is divided into five parts, the first of which analyzes spatial effects on the development of firms in the tourism industry, while the second approaches temporal and spatial variability in tourism through analytical regional science tools. The broader economic and social impacts of tourism are addressed in part three. Part four assesses specific tourism segments and tourist behaviors, while part five discusses environmental aspects and tourism destination policies. The book will appeal to scholars of regional and spatial science and tourism, as well as tourism specialists and

policymakers interested in developing science and evidence-based tourism policies.

The 2008 financial crisis triggered the worst global recession since the Great Depression. Many OECD countries responded to the crisis by reducing social spending. Through 11 diverse country case studies (Belgium, Germany, Greece, Hungary, Ireland, Italy, Japan, Spain, Sweden, United Kingdom, and the United States), this volume describes the evolution of child poverty and material well-being during the crisis, and links these outcomes with the responses by governments. The analysis underlines that countries with fragmented social protection systems were less able to protect the incomes of households with children at the time when unemployment soared. In contrast, countries with more comprehensive social protection cushioned the impact of the crisis on households with children, especially if they had implemented fiscal stimulus packages at the onset of the crisis. Although the macroeconomic 'shock' itself and the starting positions differed greatly across countries, while the responses by governments covered a very wide range of policy levers and varied with their circumstances, cuts in social spending and tax increases often played a major role in the impact that the crisis had on the living standards of families and children.

La scommessa della dichiarazione precompilata da parte dell'agenzia delle Entrate costituisce uno degli elementi del corretto rapporto tra fisco e contribuente. Eppure, nella macchina fiscale semplicità e trasparenza non possono essere confuse con regole semplicistiche. Riepilogare la disciplina dei redditi delle persone fisiche, con l'innumerabile casistica di sconti e benefici, è l'obiettivo di questa Guida: le tabelle riepilogative vogliono essere un utile e veloce passe-partout per contribuenti e intermediari. Così da evitare errori nel calcolo del dare-avere nei confronti del fisco.

This report provides an assessment of how governments can generate inclusive economic growth in the short term, while making progress towards climate goals to secure sustainable long-term growth. It describes the development pathways required to meet the Paris Agreement objectives.

Lo Studio Legale Casa&Associati nasce 12 anni fa da un'idea non convenzionale: unire all'attività professionale la ricerca scientifica, con la convinzione che il diritto possa creare reali opportunità. Oggi, guardando alla complessità del mondo attuale, continuiamo ad essere certi che questo approccio sia il più efficace. È proprio da questa idea che nascono anche le pagine di questa pubblicazione, in un momento sicuramente difficile per l'intero tessuto socio-economico nel quale operiamo. Con la presente opera abbiamo quindi inteso affrontare quelle tematiche che, alla luce della copiosa legislazione emergenziale, ci sono parse più meritevoli di attenzione rispetto alle esigenze pratiche sottoposteci in questi mesi.

Il Codice Imposte Dirette 2/2021 racchiude, in un unico volume, tutta la normativa in materia di imposizione diretta: i provvedimenti legislativi relativi a imposte sui redditi, accertamento e riscossione, agevolazioni, anagrafe tributaria e sanzioni sono annotati con un'accurata selezione di interpretazioni ministeriali e giurisprudenza. L'ampio sistema di indicizzazione garantisce un'agevole consultazione del testo. Questa edizione è aggiornata con le novità dei decreti 137/2020 ("Ristori"), 149/2020 ("Ristori-bis"), 154/2020 ("Ristori-ter"), 157/2020 ("Ristori-quater"), della legge 178/2020 ("legge di Bilancio 2021") e del decreto 183/2020 ("Milleproroghe").

On 14 February 2012, the European Commission presented its first Alert Mechanism Report (AMR), prepared in accordance with Article 3 of Regulation (EU) No 1176/2011 on the prevention and correction of macroeconomic imbalances. The AMR serves as an initial screening device, helping to identify Member States that warrant further in-depth analysis to determine whether imbalances exist or risk emerging. According to Article 5 of Regulation No. 1176/2011, these country-specific in-depth reviews should examine the nature, origin and severity of macroeconomic developments in the Member State concerned which constitute, or could lead to, imbalances. On the basis of this analysis, the Commission will establish whether it considers that an imbalance exists and what type of policy follow-up it will recommend to the Council. For Slovenia, the AMR noted that two indicators in the scoreboard exceeded their thresholds in 2010 and suggested the need to assess the development and drivers of potential imbalances. The AMR explained that in the years before the crisis, Slovenia enjoyed strong growth and domestic demand conditions, coupled with some losses in price competitiveness and a gradual widening of the current account deficit. It identified signs that overheating occurred, particularly as regards private sector credit growth, construction value added and property prices. The Slovenian economy was hit hard by the global crisis and the AMR noted that this has brought some, perhaps temporary, adjustment in the external balance but this is still at an early stage. Against this background, Section 2 examines the external and internal dimensions of imbalances including developments in competitiveness, private sector indebtedness and in asset markets. This is followed by a closer look at the implications of indebtedness of non-financial corporations for the banking sector in Section 3. Section 4 presents possible policy considerations.

The latest World Energy Outlook offers the most comprehensive analysis of what this transformation of the energy sector might look like, thanks to its energy projections to 2040. It reviews the key opportunities and challenges ahead for renewable energy, the central pillar of the low- carbon energy transition, as well as the critical role for energy efficiency.

Economic recovery from the global financial crisis of 2007–2008 has been sketchy, with some areas within the European Union (EU) still trapped in seemingly irremediable industrial stagnation and job loss. EU institutions are called upon to provide concrete amelioration for these situations, through the design and implementation of effective tax policies in accordance with the fundamental principles of EU law. In this original, innovative book, the author presents a new and expanded view of how special tax zones (STZs) – areas of land where territorial advantages are granted on direct and/or indirect taxation – can deliver growth and mitigate economic and social emergency. Recognizing that, although a number of STZs within the EU have been established, there is still no systematic framework for them in the EU legal system, the author works out a comprehensive theory for STZs in the field of European tax law, dealing incisively with the interface of STZs with such essential legal and tax aspects as the following: customs union provisions; benefits on direct and indirect taxation; State-aid rules; free movement of persons; harmful tax competition; and role of EU social cohesion policies and their implementation. Furthermore, the author develops a new model of STZs for the most disadvantaged areas of the EU – the so-called Social Cohesion Zone – to respond decisively to issues of compatibility with such critical variables of EU law as those dealing with the outer limits set by State-aid rules and fundamental freedoms, clearly demonstrating the model's practical viability. Detailed reviews of Member States' practice in existing STZs and their tax regimes are thoroughly described so different variables can be compared. As a comprehensive description of the state of knowledge about STZs, including the relevant background and their current place in EU law, this book has no precedents and no peers. It allows practitioners, policymakers, and academics in tax law to fully understand the relationship between EU law, national legislation, and STZs, focusing on the possibility of reconciling the tax sovereignty of Member States with a supporting and coordinating role of the EU institutions. It will be warmly welcomed by the tax law community.

In March 2015, the Institute for Law and Finance in Frankfurt am Main held a full-day symposium which brought together leading representatives of the public and private sectors to deliver the first high level response to the questions posed by the Commission's Green Paper on Building a Capital Markets Union. These responses are collected in this volume.

This book will change your life. You are playing persuasion games all the time, whether you realise it or not. "Now," for the first time, one of the world's top mentalists teaches YOU the hidden secrets of persuasion and influence that will enhance your personal, social and professional life. In this remarkable and exciting book, acclaimed mentalist and trainer Gilan Gork reveals the powerful psychology of subtle, successful persuasion that you can use on your clients, colleagues, family, friends... and even complete strangers! "Persuasion Games" explores, examines and explains the mind games of influence that are part of everyday life -- and how to win them. You will not only learn how to enhance

your own powers of influence in an ethical, responsible way, but also how to protect yourself from persuasive exploitation in any form. Gilan has travelled the world to find the leading experts in influence and study their methods, including the normally private, secret realm of professional 'psychics'. Discover how many seemingly 'psychic' powers are actually persuasion techniques that anyone can learn -- including a psychological model of communication that is one of the world's best-kept secrets. Welcome to the Persuasion Games.

La rivista ioAbito è uno dei punti di riferimento sul tema della casa, per gli oltre 12 000 tesserati ASPPI della Provincia di Bologna, che possiedono oltre 50 000 immobili. Gli articoli sono scritti dai consulenti ed esperti ASPPI che certificano la qualità e lo spessore dei contenuti. In questo numero articoli di: Enrico Rizzo, Amedeo Pangrazi, Simone Gheduzzi, Teresa Landuzzi, Albarosa Capanna, Antonio De Michele, Vittorio Sardini, Michele Martoni, Deborah Di Bella, Pietro Zanelli, Fabio Raimondi, Roberta Tonelli, Fabrizio Fabbri, Luigi Tommasi, Andrea Parmiggiani, David Pierinelli, Alberto Veggetti.

This paper presents a model to determine the tax effort and tax capacity of 113 countries and the main variables on which they depend. The results and the model allow a clear determination of which countries are near their tax capacity and which are some way from it, and therefore, could increase their tax revenue. This paper also determines central factors on which tax capacity depends: the level of development, trade, education, inflation, income distribution, corruption, and the ease of tax collection.

Market mistakes to avoid: “Written for investors at all levels...[a] practical, no-nonsense guide.”—Publishers Weekly One of Money Week’s Five Best Books of the Year Investors are tempted daily by misleading or incomplete information. They may make a lucky bet, realize a sizable profit, and find themselves full of confidence. Their next high-stakes gamble might backfire, not only hitting them in the balance sheet but also taking a mental and emotional toll. Even veteran investors can be caught off guard: a news item may suddenly cause havoc for an industry they’ve invested in; crowd mentality among fellow investors may skew the market; a CEO may turn out to be unprepared to effectively guide a company. How can one stay focused in such a volatile world? If you can’t trust your past successes to plan and predict, how can you avoid risky situations in the future? Patience and methodical planning will pay far greater dividends than flashy investments. In *Big Money Thinks Small*, veteran fund manager Joel Tillinghast shows investors how to avoid making these mistakes. He offers a set of simple but crucial steps to successful investing, including:

- Know yourself, how you arrive at decisions, and how you might be susceptible to self-deception
- Make decisions based on your own expertise, and do not invest in what you don’t understand
- Select only trustworthy and capable colleagues and collaborators
- Learn how to identify and avoid investments with inherent flaws
- Always search for bargains, and never forget that the first responsibility of an investor is to identify mispriced stocks

The Court of Justice has been alluding to 'abuse and abusive practices' for more than thirty years, but for a long time the significance of these references has been unclear. Few lawyers examined the case law, and those who did doubted whether it had

led to the development of a legal principle. Within the last few years there has been a radical change of attitude, largely due to the development by the Court of an abuse test and its application within the field of taxation. In this book, academics and practitioners from all over Europe discuss the development of the Court's approach to abuse of law across the whole spectrum of European Union law, analysing the case-law from the 1970s to the present day and exploring the consequences of the introduction of the newly designated 'principle of prohibition of abuse of law' for the development of the laws of the EU and those of the Member States.

This book discusses politically-feasible reform strategies that can be used to combat environmentally harmful subsidies. Metrics matter for policy and policy matters for well-being. In this report, the co-chairs of the OECD-hosted High Level Expert Group on the Measurement of Economic Performance and Social Progress, Joseph E. Stiglitz, Jean-Paul Fitoussi and Martine Durand, show how over-reliance on GDP as the yardstick of economic performance misled policy makers who did not see the 2008 crisis coming. When the crisis did hit, concentrating on the wrong indicators meant that governments made inadequate policy choices, with severe and long-lasting consequences for many people. While GDP is the most well-known, and most powerful economic indicator, it can't tell us everything we need to know about the health of countries and societies. In fact, it can't even tell us everything we need to know about economic performance. We need to develop dashboards of indicators that reveal who is benefitting from growth, whether that growth is environmentally sustainable, how people feel about their lives, what factors contribute to an individual's or a country's success. This book looks at progress made over the past 10 years in collecting well-being data, and in using them to inform policies. An accompanying volume, *For Good Measure: Advancing Research on Well-being Metrics Beyond GDP*, presents the latest findings from leading economists and statisticians on selected issues within the broader agenda on defining and measuring well-being.

This chapter presents the content of the Richard Dimbleby lecture, which has been delivered by an influential business or a political figure every year since 1972. Christine Lagarde, Managing Director of the IMF, delivered the 2014 lecture at Guildhall in London on February 3. The 44 nations gathering at Bretton Woods have been determined to set a new course based on the principle that peace and prosperity flow from the font of cooperation. Fundamentally, the new multilateralism needs to instil a broader sense of social responsibility on the part of all players in the modern global economy. A renewed commitment to

openness and to the mutual benefits of trade and foreign investment is requested. It also requires collective responsibility for managing an international monetary system that has travelled light-years since the old Bretton Woods system. The collective responsibility would translate into all monetary institutions cooperating closely mindful of the potential impact of their policies on others.

The Handbook of Family Policy examines how state and workplace policies support parents and their children in developing, earning and caring. With original contributions from 44 leading scholars, this Handbook provides readers with up-to-date knowledge on family policies and family policy research, taking stock of current literature as well as providing analyses of present-day policies, and where they should head in the future.

Electronic texts and text analysis tools have opened up a wealth of opportunities to higher education and language service providers, but learning to use these resources continues to pose challenges to scholars and professionals alike. Translation-Driven Corpora aims to introduce readers to corpus tools and methods which may be used in translation research and practice. Each chapter focuses on specific aspects of corpus creation and use. An introduction to corpora and overview of applications of corpus linguistics methodologies to translation studies is followed by a discussion of corpus design and acquisition. Different stages and tools involved in corpus compilation and use are outlined, from corpus encoding and annotation to indexing and data retrieval, and the various methods and techniques that allow end users to make sense of corpus data are described. The volume also offers detailed guidelines for the construction and analysis of multilingual corpora. Corpus creation and use are illustrated through practical examples and case studies, with each chapter outlining a set of tasks aimed at guiding researchers, students and translators to practice some of the methods and use some of the resources discussed. These tasks are meant as hands-on activities to be carried out using the materials and links available in an accompanying DVD. Suggested further readings at the end of each chapter are complemented by an extensive bibliography at the end of the volume. Translation-Driven Corpora is designed for use by teachers and students in the classroom or by researchers and professionals for self-learning. It is an invaluable resource for anyone interested in this fast growing area of scholarly and professional activity.

Renewable Heating and Cooling: Technologies and Applications presents the latest information on the generation of heat for industry and domestic purposes, an area where a significant proportion of total energy is consumed. In Europe, this figure is estimated to be almost 50%, with the majority of heat generated by the consumption of fossil fuels. As there is a pressing need to increase the uptake of renewable heating and cooling (RHC) to reduce greenhouse gas emissions, this book provides a comprehensive and authoritative overview on the topic. Part One introduces key RHC technologies and discusses RHC in the context of global heating and cooling demand, featuring chapters on solar thermal process heat

generation, deep geothermal energy, and solar cooling technologies. Part Two explores enabling technologies, special applications, and case studies with detailed coverage of thermal energy storage, hybrid systems, and renewable heating for RHC, along with case studies in China and Sweden. Users will find this book to be an essential resource for lead engineers and engineering consultants working on renewable heating and cooling in engineering companies, as well as academics and R&D professionals in private research institutes who have a particular interest in the subject matter. Includes coverage on biomass, solar thermal, and geothermal renewable heating and cooling technologies Features chapters on solar thermal process heat generation, deep geothermal energy, solar cooling technologies, and special applications Presents case studies with detailed coverage of thermal energy storage, hybrid systems, and renewable heating for RHC Explores enabling technologies and special applications

Based on a survey of 27 countries, this report provides an overview of current practices in infrastructure governance and presents practical tools to help policy makers better manage infrastructure.

Meat eating is often a contentious subject, whether considering the technical, ethical, environmental, political, or health-related aspects of production and consumption. This book is a wide-ranging and interdisciplinary examination and critique of meat consumption by humans, throughout their evolution and around the world. Setting the scene with a chapter on meat's role in human evolution and its growing influence during the development of agricultural practices, the book goes on to examine modern production systems, their efficiencies, outputs, and impacts. The major global trends of meat consumption are described in order to find out what part its consumption plays in changing modern diets in countries around the world. The heart of the book addresses the consequences of the "massive carnivory" of western diets, looking at the inefficiencies of production and at the huge impacts on land, water, and the atmosphere. Health impacts are also covered, both positive and negative. In conclusion, the author looks forward at his vision of "rational meat eating", where environmental and health impacts are reduced, animals are treated more humanely, and alternative sources of protein make a higher contribution. *Should We Eat Meat?* is not an ideological tract for or against carnivorousness but rather a careful evaluation of meat's roles in human diets and the environmental and health consequences of its production and consumption. It will be of interest to a wide readership including professionals and academics in food and agricultural production, human health and nutrition, environmental science, and regulatory and policy making bodies around the world.

Second edition of the introductory guidebook to the basic principles of constructing sound arguments and criticising bad ones. Non-technical in approach, it is based on 186 examples, which Douglas Walton, a leading authority in the field of informal logic, discusses and evaluates in clear, illustrative detail. Walton explains how errors, fallacies, and other key

failures of argument occur. He shows how correct uses of argument are based on sound strategies for reasoned persuasion and critical responses. This edition takes into account many developments in the field of argumentation study that have occurred since 1989, many created by the author. Drawing on these developments, Walton includes and analyzes 36 new topical examples and also brings in work on argumentation schemes. Ideally suited for use in courses in informal logic and introduction to philosophy, this book will also be valuable to students of pragmatics, rhetoric, and speech communication.
