A funny and meticulously well-researched book, Do Not Pass Go offers the reader a page-turning history of London through the world's most popular board game.

Factfulness meets How to Be Right in this major new book from globally bestselling economist Tim Harford 'Tim Harford is our most likeable champion of reason and rigour... clear, clever and always highly readable' Times Books of the Year 'If you aren't in love with stats before reading this book, you will be by the time you're done. Powerful, persuasive, and in these truth-defying times, indispensable' Caroline Criado Perez, author of Invisible Women 'Nobody makes the statistics of everyday life more fascinating and enjoyable than Tim Harford' Bill Bryson 'Fabulously readable, lucid, witty and authoritative . . . Every politician and journalist should be made to read this book, but everyone else will get so much pleasure and draw so much strength from the joyful way it dispels the clouds of deceit and delusion' Stephen Fry 'Wise, humane and, above all, illuminating. Nobody is better on statistics and numbers - and how to make sense of them' Matthew Syed THE SUNDAY TIMES BUSINESS BESTSELLER When was the last time you read a grand statement, accompanied by a large number, and wondered whether it could really be true? Statistics are vital in helping us tell stories - we see them in the papers, on social media, and we hear them used in everyday conversation - and yet we doubt them more than ever. But numbers - in the right hands - have the power to change the world for the better. Contrary to popular belief, good statistics are not a trick, although they are a kind of magic. Good statistics are not smoke and mirrors; in fact, they help us see more clearly. Good statistics are like a telescope for an astronomer, a microscope for a bacteriologist, or an X-ray for a radiologist. If we are willing to let them, good statistics help us see things about the world around us and about ourselves - both large and small - that we would not be able to see in any other way. In How to Make the World Add Up, Tim Harford draws on his experience as both an economist and presenter of the BBC's radio show 'More or Less'. He takes us deep into the world of disinformation and obfuscation, bad research and misplaced motivation to find those priceless jewels of data and analysis that make communicating with numbers worthwhile. Harford's characters range from the art forger who conned the Nazis to the stripper who fell in love with the most powerful congressman in Washington, to famous data detectives such as John Maynard Keynes, Daniel Kahneman and Florence Nightingale. He reveals how we can evaluate the claims that surround us with confidence, curiosity and a healthy level of scepticism. Using ten simple rules for understanding

numbers - plus one golden rule - this extraordinarily insightful book shows how if we keep our wits about us, thinking carefully about the way numbers are sourced and presented, we can look around us and see with crystal clarity how the world adds up.

From “one of the great (greatest?) contemporary popular writers on economics” (Tyler Cowen) comes a smart, lively, and encouraging rethinking of how to use statistics. Today we think statistics are the enemy, numbers used to mislead and confuse us. That’s a mistake, Tim Harford says in *The Data Detective*. We shouldn’t be suspicious of statistics—we need to understand what they mean and how they can improve our lives: they are, at heart, human behavior seen through the prism of numbers and are often “the only way of grasping much of what is going on around us.” If we can toss aside our fears and learn to approach them clearly—understanding how our own preconceptions lead us astray—statistics can point to ways we can live better and work smarter. As “perhaps the best popular economics writer in the world” (New Statesman), Tim Harford is an expert at taking complicated ideas and untangling them for millions of readers. In *The Data Detective*, he uses new research in science and psychology to set out ten strategies for using statistics to erase our biases and replace them with new ideas that use virtues like patience, curiosity, and good sense to better understand ourselves and the world. As a result, *The Data Detective* is a big-idea book about statistics and human behavior that is fresh, unexpected, and insightful.

George Orwell’s celebrated novella, *Animal Farm*, is a biting, allegorical, political satire on totalitarianism in general and Stalinism in particular. One of the most famous works in modern English literature, it is a telling comment on Soviet Russia under Stalin’s brutal dictatorship based on a cult of personality which was enforced through a reign of terror. The book tells a seemingly simple story of farm animals who rebel against their master in the hope of stopping their exploitation at the hand of humans and creating a society where animals would be equal, free and happy. Ultimately, however, the rebellion is betrayed and the farm ends up in a state as bad as it was before. The novel thus demonstrates how easily good intentions can be subverted into tyranny. Orwell has himself said that it was the first book in which he had tried, with full consciousness of what he was doing, ‘to fuse political purpose and artistic purpose into one whole.’ The book was first published in England in 1945, and has since then remained a favourite with readers all over the world, and has consistently been included in all prestigious bestseller lists for the past many years.

Voted America's Best-Loved Novel in PBS's *The Great American Read* Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

The job of the centre-half (or central defender) is to stop opposing players from scoring. In this first-ever cultural history of these traditionally bruising hard men, Leo Moynihan (*Four Four Two*) explores the unique mindset and last-ditch, bone-crunching tackles of those hellbent on destroying glory. Football is often romanticised as 'The Beautiful Game'. If true then the game's centre-half might be considered as the unsightly pimple on the end of its otherwise perfectly formed nose. The stopper, the last line of defence, the big man with small ideas. The lump who lumps it. *Thou Shall Not Pass* (the title comes from a command England captain Terry Butcher would shout before every match) celebrates the football position where brutal characters are loved for their hard-hitting tackles and bruising mentality and yet laughed at for their apparent lack of skill. As well as covering the long and illustrious history of the centre-half, the book will take the reader into the muddy penalty area frequented by our protagonists, into their domain. The places they head the ball, the places they tackle, the places in which they will stop at nothing to stop a forward. What makes them approach the game the way they do? What makes them different from those whose sole purpose is flair? Rich with amazing anecdotes, the book explore all aspects of the position and delve into the mentality of those who ply their trade there: what makes a player willing to put his face in the way of danger, how have tactics governed the role over the decades and what dark arts centre-halves must master in order to stop their foes.

Guided by the fastidious journals of an eminent Victorian adventurer by the name of Lord Dufferin, Time Moore sets off to prove his mettle in the most stunningly inhospitable place on Earth—the Arctic. Armed only with his searing wit, wicked humor, and seasickness pills, our pale suburbanite-wracked by second thoughts of tactical retreat—confronts mind-numbing cold, blood-thirsty polar bears, a convoy of born-again Vikings, and, perhaps most chilling of all, herring porridge. When he is not humiliating himself through displays of ignorance and incompetence, Moore casts a sharp eye on the local flora and fauna, immersing readers in the splendors and wonders of this treacherously beautiful region. A deliciously and inexhaustibly funny book, *Frost on My Moustache* deserves to be placed alongside those by Evelyn Waugh, Eric Newby, and Bill Bryson.

Three distinct types of contractions perform colonic motility functions. Rhythmic phasic contractions (RPCs) cause slow net distal propulsion with extensive mixing/turning over. Infrequently occurring giant migrating contractions (GMCs) produce mass movements. Tonic contractions aid RPCs in their motor function. The spatiotemporal patterns of these contractions differ markedly. The amplitude and distance of propagation of a GMC are several-fold larger than those of an RPC. The enteric neurons and smooth muscle cells are the core regulators of all three types of contractions. The regulation of contractions by these mechanisms is modifiable by extrinsic factors: CNS, autonomic neurons, hormones, inflammatory mediators, and stress mediators. Only the GMCs produce descending inhibition, which accommodates the large bolus being propelled without increasing muscle tone. The strong compression of the colon wall generates afferent signals that are below nociceptive threshold in healthy subjects. However, these signals become nociceptive; if the amplitudes of GMCs increase, afferent nerves become hypersensitive, or descending inhibition is impaired. The GMCs also provide the force for rapid propulsion of feces and descending inhibition to relax the internal anal sphincter during defecation. The dysregulation of GMCs is a major factor in colonic motility disorders: irritable bowel syndrome (IBS), inflammatory bowel disease (IBD), and diverticular disease (DD). Frequent mass movements by GMCs cause diarrhea in diarrhea predominant IBS, IBD, and DD, while a decrease in the frequency of GMCs causes constipation. The GMCs generate the afferent signals for intermittent short-lived episodes of abdominal cramping in these disorders. Epigenetic dysregulation due to adverse events in early life is one of the major factors in generating the symptoms of IBS in adulthood.

Alongside its positive impact of providing a global reach, the Internet is prone to a variety of abuses. In the 1990s it was unauthorised access of computers and impairment of the operation of computers through the introduction of viruses and worms that took centre stage. Since then the potential of the Internet for fraudulent activities has been realised by the criminal fraternity and, in recent years, we have seen, for instance, the rise of identity theft and the widespread distribution of offensive and illegal materials. The collection of essays in this volume, while being highly selective, provides a snapshot of the parameters of computer crime, the legal response and discussions surrounding ways to improve the security of cyberspace.

A book that tells the story of London since the thirties through the 28 streets, stations and utilities of the Monopoly board. In the wonderful world of Monopoly it still only cost -50 to buy a house in Islington, you can move around London with the shake of a dice and even park your car for free. In Do Not Pass Go Tim Moore, belying his reputation as a player who always paid that -10 fine rather than take a Chance, fearlessly tackles the real thing and along the way tells the story of a game and the city that frames it. Sampling the rags and the riches he stays in a hotel in Mayfair and one in the Old Kent Road, enjoys quality time with Dr Crippen in Pentonville Prison and even winds up at the wrong end of the Water Works pipe. And, solving all the mysteries you'll have pondered whilst languishing in jail and many other you certainly wouldn't, Tim Moore reveals how Pall Mall got its name, which three addresses you won't find in your A-Z and why the sorry cul-de-sac that is Vine Street has a special place in the heart of Britain's most successful Monopoly champion. The stirring travelogue of one man's erratic progress around those 28 streets, stations and utilities, Do Not Pass Go is also an epic and lovingly researched history of London's wayward progress in the 66 years since the launch of the world's most popular board game

Bradford Skow presents an original defense of the 'block universe' theory of time, often said to be a theory according to which time does not pass. Along the way, he provides in-depth discussions of alternative theories of time, including those in which there is 'robust passage' of time or 'objective becoming': presentism, the moving spotlight theory of time, the growing block theory of time, and the 'branching time' theory of time. Skow explains why the moving spotlight theory is the best of these arguments, and rebuts several popular arguments against the thesis that time passes. He surveys the problems that the special theory of relativity has been thought to raise for objective becoming, and suggests ways in which fans of objective becoming may reconcile their view with relativistic physics. The last third of the book aims to clarify and evaluate the argument that we should believe that time passes because, somehow, the passage of time is given to us in experience. He isolates three separate arguments this idea suggests, and explains why they fail.

Jeffrey Archer, the internationally bestselling author of Honor Among Thieves, As The Crow Flies, and Kane & Abel, now serves up this inventive new collection of a dozen short stories -- with a twist. Cleverly styled, with richly drawn characters and ingeniously plotted story lines, each of the twelve pieces ends with a delightfully unexpected turn of events. An imprisoned man is certain that his supposed murder victim is very much alive....A female driver is pursued relentlessly by a menacing figure in another vehicle....A young artist gets the biggest break of her career....A restless beauty manages the perfect birthday celebration....An escaped Iraqi on Saddam Hussein's death list pays an involuntary visit to his homeland. In each tale, human beings are given an opportunity to seize, a crucial problem to solve, or a danger to avoid. How will they react? How would you? Capping off the collection are two additional rewards. In the final story, Archer offers a choice of four endings. And buried in each story is another diversion -- a red herring which Archer challenges his readers to uncover.

Nella Larsen (1891-1964) occupies a central place in African-American and Modernist literature, and her status as a Harlem Renaissance woman writer is rivaled only by Zora Neale Hurston's. This Norton Critical Edition of Larsen's electrifying 1929 novel is accompanied by Carla Kaplan's insightfully detailed introduction, explanatory annotations, and a Note on the Text "Backgrounds and Contexts" connects Passing to the historical events of the day, most notably the sensational Rhinelander/Jones case of 1925. Fourteen contemporary reviews are reprinted, including those by Alice Dunbar-Nelson, W. B. Seabrook, Mary Griffin, and W. E. B. Du Bois. Little-known documents, including those by Juanita Ellsworth and Caleb Johnson, reveal America's fascination with-and fear of-the cultural phenomenon of passing. Also included are Larsen's statements on the novel and on passing, as well as a generous selection of her letters. The theme of "The Tragic Mulatto(a)" in American literature is explored through related writings by Lydia Maria Child, William Wells Brown, Kate Chopin, Mark Twain, Countee Cullen, and Langston Hughes, among others. Finally, Joseph Seamon Cotter, Jr., Jessie Redmon Fauset, Countee Cullen, W. E. B. Du Bois, Allen Semi [Nella Larsen], George S. Schuyler, Carl Van Vechten, and Langston Hughes voice their impressions of passing from the perspective of the Harlem Renaissance. "Criticism" provides sixteen diverse interpretations of Passing by, among others, Deborah E. McDowell, Judith Butler, Cheryl A. Wall, Thadious M. Davis, George Hutchinson, Mary Helen Washington, Ann duCille, Gayle Wald, Claudia Tate, and Jennifer DeVere Brody. A Chronology and Selected Bibliography are also included. Book jacket.

Deet's world turns upside down when his father is arrested for drug use. It doesn't seem possible that kind, caring Dad could be a criminal! After all, he only took the pills to stay awake so he could work two jobs. Now what will happen? How will Deet be able to face his classmates? Where will they get money? And most importantly, will Dad be okay in prison? Hurt, angry, and ashamed, Deet doesn't want to visit his father in jail. But when Mom goes back to work, Deet starts visiting Dad after school. It's frightening at first, but as he adjusts to the routine, Deet begins to see the prisoners as people with stories of their own, just like his dad. Deet soon realizes that prison isn't the terrifying place of movies and nightmares. In fact, Dad's imprisonment leads Deet to make a few surprising discoveries -- about his father, his friends, and himself. With moving realism, Kirkpatrick Hill brings to light the tumultuous experience of having a parent in jail in this honest and stirring story of a young man forced to grow up quickly.
