

Dvorak Sinfonia N 9 Op 95 Vinyl Lp Dal Nuovo Mondo

Details the excerpts, complete pieces, and movements contained in the various anthologies for musical analysis--a benefit to teachers and students of music theory.

Few composers have achieved the widespread and lasting popularity of Antonin Dvořák. He was a master of instrumentation and symphonic form, composing a total of nine symphonies. His most celebrated work, Symphony No. 9, "From the New World" (composed during Dvořák's three-year stay in America), echoes the folk spirit of his native Czechoslovakia as well as American influences, and is filled with the spontaneous melodic invention, rhythmic variety, and intensity of harmony that characterize his orchestral works. The popular acclaim accorded the symphony "From the New World" tends to overshadow Dvořák's other symphonies, but "Grove's Dictionary of Music and Musicians" notes the "interesting form folk-spirit virile serenity" of Symphony No. 8. The delightful freshness and uninhibited emotionalism of the composition have contributed to its lasting success. The Dover edition presents both symphonic masterpieces among the most popular works in the orchestral repertoire reprinted from authoritative editions in one inexpensive, practical volume. This full-size, easy-to-read score has been printed with generous margins to allow insertion of notes, analyses, etc. The sturdy binding, high quality of reproduction, and affordable price make this volume ideal for musicians, music students, and music lovers in general."

Antonin Dvořák made his famous trip to the United States one hundred years ago, but despite an enormous amount of attention from scholars and critics since that time, he remains an elusive figure. Comprising both interpretive essays and a selection of fascinating documents that bear on Dvořák's career and music, this volume addresses fundamental questions about the composer while presenting an argument for a radical reappraisal. The essays, which make up the first part of the book, begin with Leon Botstein's inquiry into the reception of Dvořák's work in German-speaking Europe, in England, and in America. Commenting on the relationship between Dvořák and Brahms, David Beveridge offers the first detailed portrait of perhaps the most interesting artistic friendship of the era. Joseph Horowitz explores the context in which the "New World" Symphony was premiered a century ago, offering an absorbing account of New York musical life at that time. In discussing Dvořák as a composer of operas, Jan Smaczny provides an unexpected slant on the widely held view of him as a "nationalist" composer. Michael Beckerman further investigates this view of Dvořák by raising the question of the role nationalism played in music of the nineteenth century. The second part of this volume presents Dvořák's correspondence and reminiscences as well as unpublished reviews and criticism from the Czech press. It includes a series of documents from the composer's American years, a translation of the review of Rusalka's premiere

with the photographs that accompanied the article, and Janáček's analyses of the symphonic poems. Many of these documents are published in English for the first time.

Content-based multimedia retrieval is a challenging research field with many unsolved problems. This monograph details concepts and algorithms for robust and efficient information retrieval of two different types of multimedia data: waveform-based music data and human motion data. It first examines several approaches in music information retrieval, in particular general strategies as well as efficient algorithms. The book then introduces a general and unified framework for motion analysis, retrieval, and classification, highlighting the design of suitable features, the notion of similarity used to compare data streams, and data organization.
