He wanted to die. He needed her help. One year ago, Meghan Wilton's husband begged her to help him die. Two months after asking her to do the unthinkable, he was dead. Now Meghan is on the run with her five-year-old son. Her new name is Zoe Roberts, and her hiding place is a cabin in the woods of Willow Creek, Tennessee. Zoe has more than the law to fear. Someone else wants her found, someone with the money and power to destroy her because she's a threat to his own freedom. The only way she can protect herself and her son is by uncovering dark and disturbing secrets that will leave her scarred forever...or get her killed. To save herself, she must return to the night her husband died. Is she brave enough to relive the worse day of her life?

Use the internet like a real spy. Untangling the Web is the National Security Agency's once-classified guide to finding information on the internet. From the basic to the advanced, this 650-page book offers a fascinating look at tricks the "real spies" use to uncover hidden (and not-so-hidden) information online. Chapters include: Google hacks Metasearch sites Custom search engines Maps & mapping Uncovering the invisible internet Beyond search engines: Specialized research tools Email lookups Finding people Researching companies A plain english guide to interworking Internet toolkits Finding ISPs Cybergeography Internet privacy and securityand over a hundred more chapters. This quote from the authors hints at the investigative power of the techniques this book teaches: "Nothing I am going to describe to you is illegal, nor does it in any way involve accessing unauthorized data, [...but] involves using publicly available search engines to access publicly available information that almost certainly was not intended for public distribution." From search strings that will reveal secret documents from South Africa ("filetype: xls site: za confidential") to tracking down tables of Russian passwords ("filetype: xls site: ru login"), this is both an instructive and voyeuristic look at how the most powerful spy agency in the world uses Google.

This compelling text explores family violence throughout the life course, from child abuse and neglect to intimate partner violence and elder abuse. Paying special attention to the social character and institutional causes of family violence, Hattery and Smith ask students to consider how social inequality, especially gender inequality, contributes to tensions and explosive tendencies in family settings. Students learn about individual preventative measures and are also invited to question the justice of our current social structure, with implications for social policy and reorganization. The second edition features a new chapter focusing on institutionalized violence affecting families of the military and police, as well as a discussion on sports and sexual abuse cases occurring on college campuses. Hattery and

Smith also examine violence against women globally and relate this to violence in the United States. Unique coverage of same-sex and multicultural couples, as well as of theory and methods, make this text an essential element of any course considering the sociology of family violence.

The work of English playwright Simon Gray (1936–2008) has always resisted ideological and stylistic labels. His artistic independence has also had an unwelcome side effect: It cost him the critical attention garnered by his peers. This book, the first monograph on Gray, examines his oeuvre from the early plays, which hack away at the formalism and humanism of traditional English satire, to the later ones, in which he explores English professionals and their problems connecting with each other. If Gray remains the least known major English dramatist of his day, he's also one of the boldest and best.

Digital Photography and Everyday Life: Empirical studies on material visual practices explores the role that digital photography plays within everyday life. With contributors from ten different countries and backgrounds in a range of academic disciplines - including anthropology, media studies and visual culture - this collection takes a uniquely broad perspective on photography by situating the image-making process in wider discussions on the materiality and visibility of photographic practices and explores these through empirical case studies. By focusing on material visual practices, the book presents a comprehensive overview of some of the main challenges digital photography is bringing to everyday life. It explores how the digitization of photography has a wide-reaching impact on the use of the medium, as well as on the kinds of images that can be produced and the ways in which camera technology is developed. The exploration goes beyond mere images to think about cameras, mediations and technologies as key elements in the development of visual digital cultures. *Digital Photography and Everyday Life* will be of great interest to students and scholars of Photography, Contemporary Art, Visual Culture and Media Studies, as well as those studying Communication, Cultural Anthropology, and Science and Technology Studies.
