Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime

Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Old School Photography is a must-have modern manual for learning how to create great photographs with a 35mm film camera. Famed YouTube personality Kai Wong expertly and humorously shares 100 essential tips for selecting and using film cameras, shooting with film and various lenses, and employing specific techniques to ensure you can get great results quickly. Known for his breadth of knowledge and quick wit, Kai Wong delivers an informative and entertaining read on how to take great film photos.

- An informative and entertaining read on how to take great film photos
- A must-have guide for those new to old-school film techniques
- A much-needed book for the current resurgence of vintage 35mm film cameras

Renewed interest in film photography has surged in the past few years, both among those rediscovering their past passion and those discovering it for the first time. Vintage cameras that had previously lost their value are now often worth more than they first sold for due to high demand amongst enthusiasts, students, and collectors. Film manufacturers have even started reissuing long discontinued stocks—for example, Kodak's much-loved and recently re-released classic Ektachrome slide film. In our modern world, billions of people have access to instantaneous photography on their mobile phones, but as a result there has been a resurgent desire for a more tactile, physical, unaltered, and thus honest medium. Much of which, ironically, ends up on the internet, with photography fans and influencers sharing their images across Instagram, Flickr, YouTube, and the like. More so than with digital photography, film photography requires a sense of craft, skill, patience, technical knowledge, and a trial-and-error process that results in a greater sense of accomplishment. Old School Photography is both enlightening and humorous, and attracts a new generation of fans who are eager to experiment with film cameras, make prints, and post their film photographs online.

Sacred Nature Volume 2: Reconnecting People to Our Planet is a beautiful 288-page fine art wildlife photography book, supporting the protection of our planet and its priceless wild places. This book takes the ethos of the first volume and applies it to the whole planet - to our savannas, forests, deserts, mountains, oceans and polar regions. Jonathan and Angela's intention is to reveal the wonder and beauty of our world, instilling a sense of awe and concern for its well being.

In 2016 Jonathan and Angela Scott published their award-winning book *Sacred Nature: Life's Eternal Dance*. This book, the standard edition of which is now out of print, was Angela's vision brought to life by the artistry of their son David's design work. The book was met with overwhelming success and won Gold in the 2017 Independent Publishers awards (IPPY) for Photography. Volume 1 centred around a place close to the Scotts' hearts -the vast Mara-Serengeti ecosystem in East Africa where they have spent much of the past forty years, somewhere they describe as The Last Place on Earth. This is a corner of Eden so breathtaking to behold that it is almost beyond belief that it might one day die for lack of care and foresight on the part of humanity. We must do everything we can to help protect these last wild places. The Scotts explored the natural rhythms that permeate the African savannahs and woodlands, illuminating life's eternal dance.

Ever wonder why Estonian animation features so many carrots or why cows often perform pyramids? Well, neither question is answered in Chris Robinson's new book, *Estonian Animation*. Robinson's frank, humorous, and thoroughly researched book traces the history of Estonia's acclaimed animation scene from early experiments in the 1930s to the creation of puppet (Nukufilm) and cel (Joonisfilm) animation studios during the Soviet era, as well as Estonia's surprising international success during the post-Soviet era. In addition, Robinson writes about the discovery of films by four 1960s animation pioneers who, until the release of this book, had been unknown to most Estonian and international animation historians.

An argument over the abandoned puppy they find on their front doorstep and her yearning to keep the dog are the final straws in Dash's decision to leave her twenty-year marriage to Andrew, who does not seem to realize that, with her mother gone and their daughter at college, Dash needs more than his hypochondria and an endless round of faculty parties. Reprint. 40,000 first printing.

No other photographer in modern times has recorded war and its aftermath as widely and unsparingly as Don McCullin. After a childhood in London during the Blitz, and after the hardships of evacuation, McCullin feels his life has indeed been shaped by war. From the building of the Berlin Wall at the height of the Cold War to El Salvador and Kurdistan, McCullin has covered the major conflicts of the last fifty years, with the notable exception of the Falklands, for which he was denied access. His pictures from the Citadel in Hue and in the ruins of Beirut are among the most unflinching records of modern war. The publication of many of his greatest stories in the *Sunday Times* magazine did much to raise the consciousness of a generation, even if he himself now fears that photographs cannot prevent history from repeating itself. The brutality of conflict returns over and over again. McCullin here voices his despair. McCullin recounts the course of his professional life in a series of devastating texts on war, the events and the power of photography. The conclusion

of the book marks McCullin's retreat to the Somerset landscape surrounding his home, where the dark skies over England remind him yet again of images of war. Despite the sense of belonging and even contentment, for him there is no final escape.

Potatoes are the world's fourth most important food crop, yet they were unknown to most of humanity before 1500. *Feeding the People* traces the global journey of this popular foodstuff from the Andes to everywhere. The potato's global history reveals the ways in which our ideas about eating are entangled with the emergence of capitalism and its celebration of the free market. It also reminds us that ordinary people make history in ways that continue to shape our lives. *Feeding the People* tells the story of how eating became part of statecraft, and provides a new account of the global spread of one of the world's most successful foods.

Publisher Description

This new revised edition of this popular text provides an accurate, balanced and readable history of Korea from 1910 to the present day.

This inspiring book tells the story of a photographer's journey to find the mysterious black leopard. There are few creatures as gorgeous and elusive as the black leopard. In Africa, these magnificent cats are so rare as to be the stuff of legend. Will Burrard-Lucas's love for leopards began during his childhood in Tanzania and propelled him into a career as a wildlife photographer. In his quest to create intimate portraits of animals, he developed innovative technology, including a remotely controlled camera buggy and a high quality camera trap system for photographing nocturnal creatures. Then, one day in 2018, he heard about sightings of a young African black leopard in Kenya and with the help of people from the local community, he succeeded in capturing a series of high-quality photographs of the elusive cat. In this compelling and visually stunning book, Burrard-Lucas tells his story of creativity, entrepreneurship, and passion for wild animals, alongside awe-inspiring images of lions, elephants, and the black leopard itself. • **STAR WILDLIFE PHOTOGRAPHER:** Will Burrard-Lucas's passion for nature and expertise in camera technology have earned him coverage from National Geographic, The New York Times, and the BBC—and over 1 million fans enjoy his breathtaking work online. • **NATURE'S HIDDEN WONDERS:** Black leopards are individual animals in whom a gene mutation results in excess melanin and an elegant black coat. Most are found in Southeast Asia, where lush vegetation offers them camouflage. In the semiarid shrub lands of Africa, black leopards are extraordinarily rare. Burrard-Lucas's images—showing these beautiful creatures prowling their territory under cover of night—are vivid reminders of nature's hidden wonders. • **INCREDIBLE STORY:** This is an adventure story that takes place in remote and wild corners of Africa. It reveals Burrard-Lucas's devotion, vision, and innovation that led to him capturing photos that are not only incredibly rare, but also breathtakingly beautiful. Perfect

for: • Aspiring and professional photographers • Photography buffs • Nature and animal lovers • Big cat enthusiasts • Conservationists • National Geographic readers • Fans of memoir and adventure stories • Travelers to Eastern and Southern Africa
