Adolescence is a distinct, yet transient, period of development between childhood and adulthood characterized by increased experimentation and risk-taking, a tendency to discount long-term consequences, and heightened sensitivity to peers and other social influences. A key function of adolescence is developing an integrated sense of self, including individualization, separation from parents, and personal identity. Experimentation and novelty-seeking behavior, such as alcohol and drug use, unsafe sex, and reckless driving, are thought to serve a number of adaptive functions despite their risks. Research indicates that for most youth, the period of risky experimentation does not extend beyond adolescence, ceasing as identity becomes settled with maturity. Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies. Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes. Accordingly adolescents lack mature capacity for self-regulations because the brain system that influences pleasure-seeking and emotional reactivity develops more rapidly than the brain system that supports self-control. This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system, raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century. It was in this context that the Office of Juvenile Justice and Delinquency Prevention (OJJDP) asked the National Research Council to convene a committee to conduct a study of juvenile justice reform. The goal of Reforming Juvenile Justice: A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform, to assess the new generation of reform activities occurring in the United States, and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts.

"This book is a must-read for anyone who wants to tackle mass incarceration, by one of the country's most thoughtful scholars." --Rachel E. Barkow, author of Prisoners of Politics: Breaking the Cycle of Mass Incarceration A provocative and timely exploration of how plea bargaining prevents true criminal justice reform and how we can fix it When Americans

think of the criminal justice system, the image that comes to mind is a trial—a standard courtroom scene with a defendant, attorneys, a judge, and most important, a jury. It's a fair assumption. The right to a trial by jury is enshrined in both the body of the U.S. Constitution and the Bill of Rights. It's supposed to be the foundation that undergirds our entire justice system. But in *Punishment Without Trial: Why Plea Bargaining Is a Bad Deal*, University of North Carolina law professor Carissa Byrne Hessick shows that the popular conception of a jury trial couldn't be further from reality. That bedrock constitutional right has all but disappeared thanks to the unstoppable march of plea bargaining, which began to take hold during Prohibition and has skyrocketed since 1971, when it was affirmed as constitutional by the Supreme Court. Nearly every aspect of our criminal justice system encourages defendants—whether they're innocent or guilty—to take a plea deal. *Punishment Without Trial* showcases how plea bargaining has undermined justice at every turn and across socioeconomic and racial divides. It forces the hand of lawyers, judges, and defendants, turning our legal system into a ruthlessly efficient mass incarceration machine that is dogging our jails and punishing citizens because it's the path of least resistance. Professor Hessick makes the case against plea bargaining as she illustrates how it has damaged our justice system while presenting an innovative set of reforms for how we can fix it. An impassioned, urgent argument about the future of criminal justice reform, *Punishment Without Trial* will change the way you view the criminal justice system.

CONTRACTS--GAMING----QUESTION or FACT--A newspaper offered a prize of an automobile to the baby receiving the greatest number of votes in a baby parade, votes to be made on coupons appearing in the newspaper.' The plaintiff subscribed to and paid for fifty copies for one year. Held: It is a question of fact whether or not the intent of the plaintiff was to enter into a gaming transaction or a bona fide subscription to the paper. *Leonard v. Pennypacker*, 89 Atl. Rep. 26 (N. J. 1913). \_ At the English common law, wagers and bets on almost every subject were enforceable contracts. Gradually this rule was limited by the courts, and it was held that no wagers which could be construed as against public policy would be enforced. *Gilbert v. Sykes*, 16 East, 150 (Eng. 1812); *Ramboll Thackoorseydass v. Soojumnul Dhondmull*, 8 Moo. P. C. 300 (Eng. 1848). By statute (8 & 9 Vict, c. 109), all wagering contracts are declared void, save only prizes to be awarded to the winner in a sport. In this country, owing to the Puritan influences of \_the early settlers, gaming contracts have usually, irrespective of their subject matter, been\_ held void as against public policy. *Irwin v. Williar*, 110 U. S. 499 (1883); *Pritchett v. Ins. Co. of No. America*, 3 Yeates, 458 (Pa. 1803); *Amory v. G1lman*, 2 Ma. 1 (1806). SiNhen the facts give rise to some doubt as to the bona fides of the transaction, it is usually held, as in the principal case, that \_the intent of the contracting parties is a question for the jury. *Rankin v. The office of notary public has a long and proud history in our society. Their work is rarely glamorous, but it is so important that the highest courts in the nation routinely accept properly notarized documents as evidence in legal matters. In fact, the law governing notaries gives them the same mission as sworn law enforcement officers, "to serve and protect."

This report from the Select Committee on Modernisation of the House of Commons (HCP 282, session 2007-08, ISBN 9780215521675), focuses on regional accountability. The Governance of Britain Green Paper (Cm. 7170, ISBN 9780101717021) put forward proposals for improved democratic accountability and scrutiny of the delivery of public services in the English regions. The Committee, in this report, has concluded that there is clear evidence of an accountability gap at regional level. Regional Development Agencies (RDAs), although accountable to ministers, still conduct many activities that are not subject to a regular, robust scrutiny, and the Committee believes more should be done to monitor the delivery of services. With this in mind, the Committee recommends the establishment of a system of regional select committees, with one select committee for each of the administrative regions in England, with the exception of London. Further, the Committee recommends that up to two regional grand committee meetings should take place in each session for each of the 8 regions. To avoid an adverse impact on House Members' other commitments, membership of regional committees should consist of 10 Members in total. This report therefore sets out a desirability of establishing new structures within the House of Commons to improve regional accountability and Parliamentary scrutiny.

"A must read for parents, educators, and people with dyslexia." -Gordon F. Sherman, Ph.D., Past-President International Dyslexia Association Did you know that many successful architects, lawyers, engineers—even bestselling novelists—had difficulties learning to read and write as children? In this groundbreaking book, Brock and Fernette Eide explain how 20% of people—individuals with dyslexia—share a unique learning style that can create advantages in a classroom, at a job, or at home. Using their combined expertise in neurology and education, the authors show how these individuals not only perceive the written word differently but may also excel at spatial reasoning, see insightful connections that others simply miss, understand the world in stories, and display amazing creativity. Blending personal stories with hard science, *The Dyslexic Advantage* provides invaluable advice on how parents, educators, and individuals with dyslexia can recognize and use the strengths of the dyslexic learning style in: material reasoning (used by architects and engineers); interconnected reasoning (scientists and designers), narrative reasoning (novelists and lawyers); and dynamic reasoning (economists and entrepreneurs.) With prescriptive advice and inspiring testimonials, this paradigm-shifting book proves that dyslexia doesn't have to be a detriment, but can often become an asset for success.
