New Themes and Updated Content -- presented in a variety of genres and in authentic materials -- challenge and engage students intellectually. Enhanced Focus on Academic Skills, more purposeful integration of critical thinking, and an enhanced focus on academic skills such as inferencing, synthesizing, notetaking, and test taking help students develop strategies for success in the classroom and on standardized tests. A structured approach gives students opportunities for more extended and creative oral practice, for example, presentations, simulations, debates, speeches, public service announcements and more. A New Design with full color pages, more photos, illustrations, and graphic organizers fosters student engagement and makes the content come alive. MyNorthStarLab, the easy-to-use online companion of the NorthStar series, saves time and improves student results. Saves Time With automatically graded exercises for every unit of each book, instructors no longer have to create or grade homework. This gives them more time to prepare classroom lessons. Instructors can choose exercises and set due dates with just a few clicks. Homework for an entire semester can be set up in less than an hour. Improves Results Students have more opportunities to practice English in more ways -- from video exercises and audio discussion boards to vocabulary games and academic practice. These new exercises help students learn more English, more quickly. Immediate feedback on their performance allows students to come to class better prepared. If students do not pass a section of a unit test, they automatically receive new exercises targeting areas that need improvement. The MyNorthStarLab Access Code card is also available on its own, without the Student Book.

The parallel books are linked at each level by theme, grammar and vocabulary. Thinkers50 Management Thinker of 2015 Whitney Johnson has a goal: to help us identify and achieve our dreams. Her belief is that we can each achieve greater happiness when focusing both on our dreams and on other people in our lives. In this inspiring book, Johnson directs her attention to teaching women, in particular, a three-step model for personal advancement and happiness. She first encourages us to Dare to boldly step out, to consider disrupting life as we know it. Then she teaches us how to Dream, to give life to the many possibilities available, whether to start a business, run a marathon, or travel the world. She shows us how to "date" our dreams (no need to commit!) and how to make space for dreams. Finally, Whitney's model brings out the businesswoman in her; she teaches us to Do, to execute our dreams. She showcases the importance of sharing dreams with others to give them life, creating your own "dream team." Rich with real stories of women who have dared to dream, Dare, Dream, Do offers a practical framework for making remarkable things happen.

Scales describing language proficiency in a series of levels can provide orientation for educational programmes, criteria for assessment, and reporting to stakeholders. However, in most cases such instruments are produced just by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the «Common Reference Levels» in the Common European Framework of Reference for modern languages. Short stand-alone descriptors were (i) developed and classified, (ii) refined and elaborated in workshops, and then (iii) scaled by analyzing the judgments of one hundred teachers on the English language proficiency of the learners in their classes.
