"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This reissue of Cambridge's classic series of commentaries on the New English Bible conveys some of the best biblical scholarship of its time, with many of its contributors going on to become famous scholars in their field and the church. The commentaries are designed for use in schools and colleges, as well as for the minister and general reader. Each volume comments on one book, or a few short books, of the Old Testament and in each the text is given in full. Sections of text and commentary alternate, so that the reader does not have to keep two books open, or turn from one part of the book to the other, or refer to a commentary in small type at the foot of the page. Great care has been taken to see that the commentary is suitable for the student and the general reader: there is no Greek or Hebrew and no strings of biblical reference, making them an accessible and thought provoking read. In addition to the general introductory volume, Understanding the Old Testament, there is a volume of maps and plates: Old Testament Illustrations.

In A Life in Learning, award-winning professor Anthony Aveni tells the personal story of his six decades in college classrooms and some of the 10,000 students who have filled them. Through anecdotes of his own triumphs and tribulations—some amusing, others heartrending—Aveni reveals his teaching story and thoughts on the future of higher education. Although in recent years the lecture has come under fire as a pedagogical method, Aveni ardently defends lecturing to students. He shares his secrets on crafting an engaging lecture and creating productive dialogue in class discussions. He lays out his rules on classroom discipline and tells how he promotes the lost art of listening. He is a passionate proponent of the liberal arts and core course requirements as well as a believer in sound teaching promoted by active scholarship. Aveni is known to his students as a consummate storyteller. In A Life in Learning he shares real stories about everyday college life that shed light on serious educational issues. The result is a humorous, reflective, inviting, and powerful inquiry into higher education that will be of interest to anyone invested in the current and future state of college and university education.

The heroes in this story are just like you, ordinary women and men who observed failures of the law and felt an irrepressible desire to correct them. What is there to do when law abiding, hard working people can't find justice from the very system that has been

established to protect them from monsters among us. The deeds of heroism in this book were not inspired by unrealistic characters such as James Bond or Jason Bourne. They do not reflect the Hollywood version of what it is to be a hero, but are representations of what could happen if good men and women say "enough". If this peaks your desire then read on.

Slave factories, a crucial but largely forgotten part of the slave trade, were bases on the African coast that existed to buy slaves and resell them to slaving ships. They were places of notorious suffering and exploitation, detested by both the natives and by white slavers. This story, in 12 brief chapters, focuses on the intersection of lives at one slave factory, Porto de Maria. Diego, its boss, is jaded. Matthew, its resident priest, has a terrible secret that drove him to Africa. Bowlu, his slave, struggles to find recompense for what he's lost. William, the ageing captain of a visiting slaving ship, commands a divided crew, worries about interdiction at sea, and has come to Porto de Maria to determine his future. When these lives cross on the eve of the American Civil War, none of them will remain the same. From Martian Lit. More info at http: //martianlit.com

Economics for Business, 3rd edition, is an essential introduction to economics, tailor-made for business students. The text demonstrates the relevance of applying economics principles to solve business problems, using a unique business first approach. Key economic theories are clearly explained within the context of modern business, drawing on a wealth of contemporary examples to bring the topics to life. The pedagogy allows students to consolidate their learning and equips them with the economic tools to confront real business situations.

Undergraduate economics students begin and end their study of economics with the simple claim that economics is value free. Only in a policy role will values and beliefs enter into economic work; there can be little meaningful dialogue by economists about such personal views and opinions. This view, now well over 200 years old, has been challenged by heterodox thinkers in economics, and philosophers and social scientists outside the discipline all along the way. However, much of the debate in modern times has been narrowly focused on philosophical methodological issues on one hand or theological/sectarian concerns on the other. None of this filters down to the typical undergraduate even in advanced courses on the history of economic thought. This book presents the notion that economic thinking cannot escape value judgments at any level and that this understanding has been the dominant view throughout most of history. It shows how, from ancient times, people who thought about economic matters integrated moral reflection into their thinking. Reflecting on the Enlightenment and the birth of economics as a science, Halteman and Noell illustrate the process by which values and beliefs were excluded from economics proper. They also appraise the reader with relevant developments over the last half-century which offer promise of re-integrating moral reflection in economic research. With the advent of interdependency concepts and game theory, behavioral economics and the infusion of other social sciences, especially psychology, into economic considerations, the door is once again open to moral reflection. It is a sensitive subject that can be divisive for many and there is little if any assessable literature on the topic at the undergraduate level. One way to approach the subject is to follow the path of the great thinkers of the past and observe how they worked through economic issues

from a set of values that was foundational to their thinking. This places moral thinking in a context illuminating the complexity and importance of moral reflection and illustrating its impact on the culture of the times. Reckoning with Markets follows this method with a deliberate effort to cast the material in terms that will engage the undergraduate student. A number of vignettes which apply the perspectives of key figures in the history of economic thought to modern values and policy questions are provided.

This book addresses why and how the aging process is accelerated under diabetes, providing valuable and comprehensive information for the management of various types of diabetes- and aging-related disorders. Since several papers have shown that average life span and healthy life expectancy are reduced in diabetic patients, especially in those with a long history of disease, the early detection and treatment of diabetes-related complications are urgently needed in order to slow the aging process and help people successfully live with diabetes. Each chapter of this book addresses a specific diabetes and aging-related complication. The topics covered include not only diabetic vascular complications, the leading causes of morbidities and high mortality rates in both type 1 and type 2 diabetic patients, but also other aging-related complications such as Alzheimer's disease, osteoporosis, periodontitis and cancer growth and metastasis. Experts on each topic discuss the background of the aging process and methods for coping with diabetes-related complications. The book as a whole, as well as the individual chapters, offer a valuable resource for researchers and practitioners in the fields of diabetic studies, gerontology, and aging science.
