"[This book examines] key principles and cases by leveraging the distinct voices of leading scholars and instructors from across Canada. This ... analysis gives students a better sense of how administrative boards and tribunals work in practice. This combination of theory and applied learning has resulted in a highly effective teaching tool that students can take from the classroom into practice."--Publisher's description. This is the second edition of this highly regarded comparative overview of corporate law. It argues that the main function of corporate law is to address conflicts of interests and that, despite economic and social diversity, legal strategies employed across jurisdictions are surprisingly similar.

This short and accessible book is the first to focus exclusively on the inter-relation between transitional justice and rule of law reconstruction in post-conflict and post-authoritarian states. In so doing it provides a provocative reassessment of the various tangled relationships between the two fields, exploring the blind-spots, contradictions and opportunities for mutually-beneficial synergies in practice and scholarship between them. Though it is commonly assumed that transitional justice for past human rights abuses is inherently conducive to restoring the rule of law, differences in how both fields conceptualise the rule of law, the scope of transition and obligations to citizens have resulted in divergent approaches to transitional criminal trial, international criminal law, restorative justice and traditional justice mechanisms. Adopting a critical comparative approach that assesses the experiences of post-authoritarian and post-conflict polities in Latin America, Asia, Europe and Africa undergoing transitional justice and justice sector reform simultaneously, it argues that the potential benefits of transitional justice are exaggerated and urges policy-makers to rebalance the compromises inherent in transitional justice mechanisms against the foundational demands of rule of law reconstruction. This book will be of interest to scholars in the fields of transitional justice, rule of law, legal pluralism and peace-building concerned by the failure of transitional justice to leave a positive legacy to the justice system of the states where it operates. 'This is a bold and nuanced scrutiny of the international system's approach to transitional justice and the much vaunted rule of law project. Dr McAulifee should be congratulated for this well-researched book which should be a must read for not only scholars and researchers in transitional justice and peace and conflict studies, but also policy-makers in the international system.' Dr. Hakeem O. Yusuf, Senior Lecturer, University of Strathclyde and author of *Transitional Justice, Judicial Accountability and the Rule of Law*.

Concerned that scholars in various disciplines were talking past each other and that policy debates concerning judicial independence were impoverished, the editors convened a conference of scholars from the disciplines of law, political science, history, economics and sociology. *Judicial Independence at the Crossroads: An Interdisciplinary Approach* is a collection of essays reflecting the disciplinary perspectives of the authors and the shared understanding that emerged from the conference.

This book introduces and develops Contract Governance as a new approach to contract theory. While the concept of governance has already been developed in Williamson's seminal article, it has, ironically, not received much attention in general contract law theory. Indeed, Contract Governance appears to be an important and necessary complement to corporate governance and in fact, as the second, equally important pillar of governance research in the core of private law. With this in mind,

Grundmann, Möslin, and Riesenhuber provide a novel approach in setting an international and interdisciplinary research agenda for developing contract law scholarship. Contract Governance focuses particularly on the ways in which a governance perspective leads to research questions that have been neglected in traditional contract law scholarship, and how, from a governance perspective, the questions are dealt with in a different manner and style. Combining substantive chapters and commentaries, this collection of essays addresses an array of topics, including: third party impact and contract governance problems in herd behaviour; governance of networks of contracts; governance in long-term contractual relationships; contract governance and rule setting; and contract governance and political dimensions.

As Felix Frankfurter and James Landis write in their preface to *The Business of the Supreme Court*, "To an extraordinary degree legal thinking dominates the United States. Every act of government, every law passed by Congress, every treaty ratified by the Senate, every executive order issued by the President is tested by legal considerations and may be subjected to the hazards of litigation. Other Nations, too, have a written Constitution. But no other country in the world leaves to the judiciary the powers which it exercises over us." This classic volume, first published in 1928, originated in a series of articles written by Frankfurter, then a professor of law at Harvard University, and his student, Landis, for the *Harvard Law Review*. These articles

chronicled and analyzed the many judiciary acts that were passed between 1789 and 1925, and illuminated the intimate connection between form and substance in the life of American law. For instance: When a community first decided to enact zoning laws--the Supreme Court had to approve. When the United States made a treaty with Germany following World War I--the Supreme Court had to define the limits and meaning of the treaty. Newly reissued with an introduction by constitutional expert Richard G. Stevens, *The Business of the Supreme Court* is still as fresh and relevant today as it was when first published. It is a work that will aid the student of the law to both love the law and remain true to its purposes.
