A fully-illustrated guide to karate techniques and their application by a Japanese expert

Shotokan Karate is one of the most effective forms of self-defense but it is this area that is most ignored in traditional Shotokan dojos. This modest manual is different from most Shotokan Karate texts because it focuses on the self-defense application of karate. Traditional Shotokan karate concentrates on three primary areas. They are basics or Kihon, Kata or forms, and sparring or kumite. The sparring may consist of five times sparring, three times sparring, one time sparring, semi-free sparring and free sparring. Self-defense training is seldom practiced and this manual hopes to fill that gap for students of Shotokan and other traditional styles of Karate. This manual covers the basic principles of self-defense, use of force factors in self-defense, simple and effective self-defense techniques to counter arm grabs, body grabs, choke attacks, punching and kicking attack counters, club attacks, knife attacks, gun attacks, ground attacks and multiple attacker self-defense techniques.

Karate Science: Dynamic Movement is rooted in the teachings of the masters. This book nucleates that knowledge, clarifying and distilling the key principles behind movement dynamics. Martial instruction, both in print and in person, tends to focus on stances and finishing positions. But dynamics, motion, sensation . . . they are karate's connective tissue--and they are the heart of this book.

Tsuku Kihon refers to powerful and dynamic techniques used and taught by some Shotokan karate instructors. The idea behind Tsuku Kihon is that power and closing distance are greatly enhanced by propelling the body forward using basic karate principles. A group of approximately 25 Tsuku Kihon combinations was developed by several Shotokan instructors in the middle of the 20th century. Sensei Luis Bernardo Mercado decided to expand and categorize Tsuku Kihon in order to increase its applications and to create a formal structure for teaching them. Many months of trial and error by the author of this book resulted in an additional 42 combinations and three methods by which Tsuku Kihon can be systematically taught to intermediate and advanced karate students. This second edition of Tsuku Kihon is expanded to include several more exercises that will help practitioners improve their skills in this art form. Chapter 3 is for instructors to use as an introduction of Tsuku Kihon to beginners below brown belt. These exercises teach how to drop into an attack and end up in a complete front stance. Chapters 10 and 11 are meant for advanced students who have been training in Tsuku Kihon for about one year. Using the heavy bag and makiwara will sharpen skill at all levels and improve kime and distancing. Chapter 14 integrates sweeps into Tsuku Kihon combinations, which will raise kumite to a higher level of proficiency. Together, these additional drills will make for a more rounded martial arts practitioner, competitor, and improve self-defense capabilities. Another great addition to this updated book is beautiful artwork by Nobu Kaji (tsuku kihon, kihon, and kata

techniques), Egil Thompson (samurai scene drawings) and Mike Thompson (wood inlay artwork for back cover). All these original works of art give a sense of real action and martial arts spirit. This introduction to karate teaches both the physical training and the mental philosophy necessary for karate mastery. The book also provides the complete history of karate.

A classic story of one man's confrontation with the self through Karate. In 1962 at age twenty-two, C. W. Nicol left Wales to study Karate in Japan. He quickly found that the study of the martial art engaged his whole being and transformed his outlook on life. Moving Zen is the multifaceted story of a young man who arrived in Japan to study the technique of, and spirit behind, Karate. Joining the Japan Karate Association, or Shotokan, Nicol discovered that Karate, while extremely violent, also called for politeness and a sense of mutual trust and responsibility. He learned that the stronger the Karateka, the more inclined he was to be gentle with others. Those who have gained a measure of skill but have not yet achieved spiritual maturity are the dangerous practitioners. Studying kata, Nicol came to realize that these forms are, in essence, moving Zen and that the ultimate goal of all the martial arts is tranquility. Through the help of many gifted teachers, C. W. Nicol gained his black belt, and moved progressively closer to his goal of tranquility. His story, Moving Zen, was first published in 1975 and has achieved the status of a modern classic.

There are many exercise programs out there to choose from; however, choosing martial arts as that exercise venue is a big decision. As in all sports, dedication and discipline are required in your chosen sport to become good. In choosing the martial arts as your pursuit, that dedication and discipline is at a very high standard. It becomes a lifetime devotion which is geared towards a code of honor, a creed to follow, and responsibility to carry your skills to a higher human level. This book is not just about martial arts or about you making a survival choice regarding a self-defense endeavor; it is also about life and longevity as well as how to stay and maintain that state of physical well-being. This maintenance or balance formulates the essence of "Taijiquan" the philosophical concept for both its defense training and its health benefits. I hope in reading this book it will help you to choose wisely. What would happen if the masters of different martial art's academies join forces to devise one master form of martial arts? This should include all the martial arts systems, styles, philosophies, and functionalities and to embrace the hidden secrets of their individual styles and formulate one master super self-defense universal system that is all incorporating and encompassing. A structure in which entails the very essence of human survival. This new system of martial arts would maintain the subsistence for the sacredness and protection of our evolutionary way. This "way" is the continuation of the human-species. Longevity depends on maintaining your survival skills and survival skills depend on maintaining your health. It is all tied together and there is no separation of these factors. This book is about that; to maintain and live a healthy and long life through the use of the martial arts format. I called the union above "The Yoda System."
