Fairies are real, and they're all around us! Award-winning author-illustrator Phoebe Wahl offers a fanciful and beautifully illustrated peek into the hidden world of fairies, sprites, and other magical creatures. A girl searches for fairies in her backyard and the woods beyond, following little clues and traces of magic. Fairies and other magical creatures can be found on every page, hidden among the flowers, trees and pebbles. But although readers can see them, the girl keeps searching, just one step behind... In the end, it is clear (both to the girl and readers) that there is magic all around, even when it's hidden in plain sight. Phoebe Wahl takes us deep into the world of fairies, and her vibrant, multi-textured woodland scenes are every bit as enchanting as the creatures therein. A gorgeously illustrated paean to imagination and the natural world. "Delightful . . . This gently magical outing will appeal not only to longtime lovers of European folklore, but also to fans of the popular "fairy door" phenomenon."--Kirkus Reviews

BANNED: The Golden Book of Chemistry Experiments was a children's chemistry book written in the 1960s by Robert Brent and illustrated by Harry Lazarus, showing how to set up your own home laboratory and conduct over 200 experiments. The book is controversial, as many of the experiments contained in the book are now considered too dangerous for the general public. There are apparently only 126 copies of this book in libraries worldwide. Despite this, its known as one of the best DIY chemistry books ever published. The book was a source of inspiration to David Hahn, nicknamed "the Radioactive Boy Scout" by the media, who tried to collect a sample of every chemical element and also built a model nuclear reactor (nuclear reactions however are not covered in this book), which led to the involvement of the authorities. On the other hand, it has also been the inspiration for many children who went on to get advanced degrees and productive chemical careers in industry or academia.
